SUREN NETWORK CERTIFIED NETWORK ASSOCIATE

PHYSICAL CONNECTION TEST

1. Types of mediums ?

Radio frequency → wireless connection

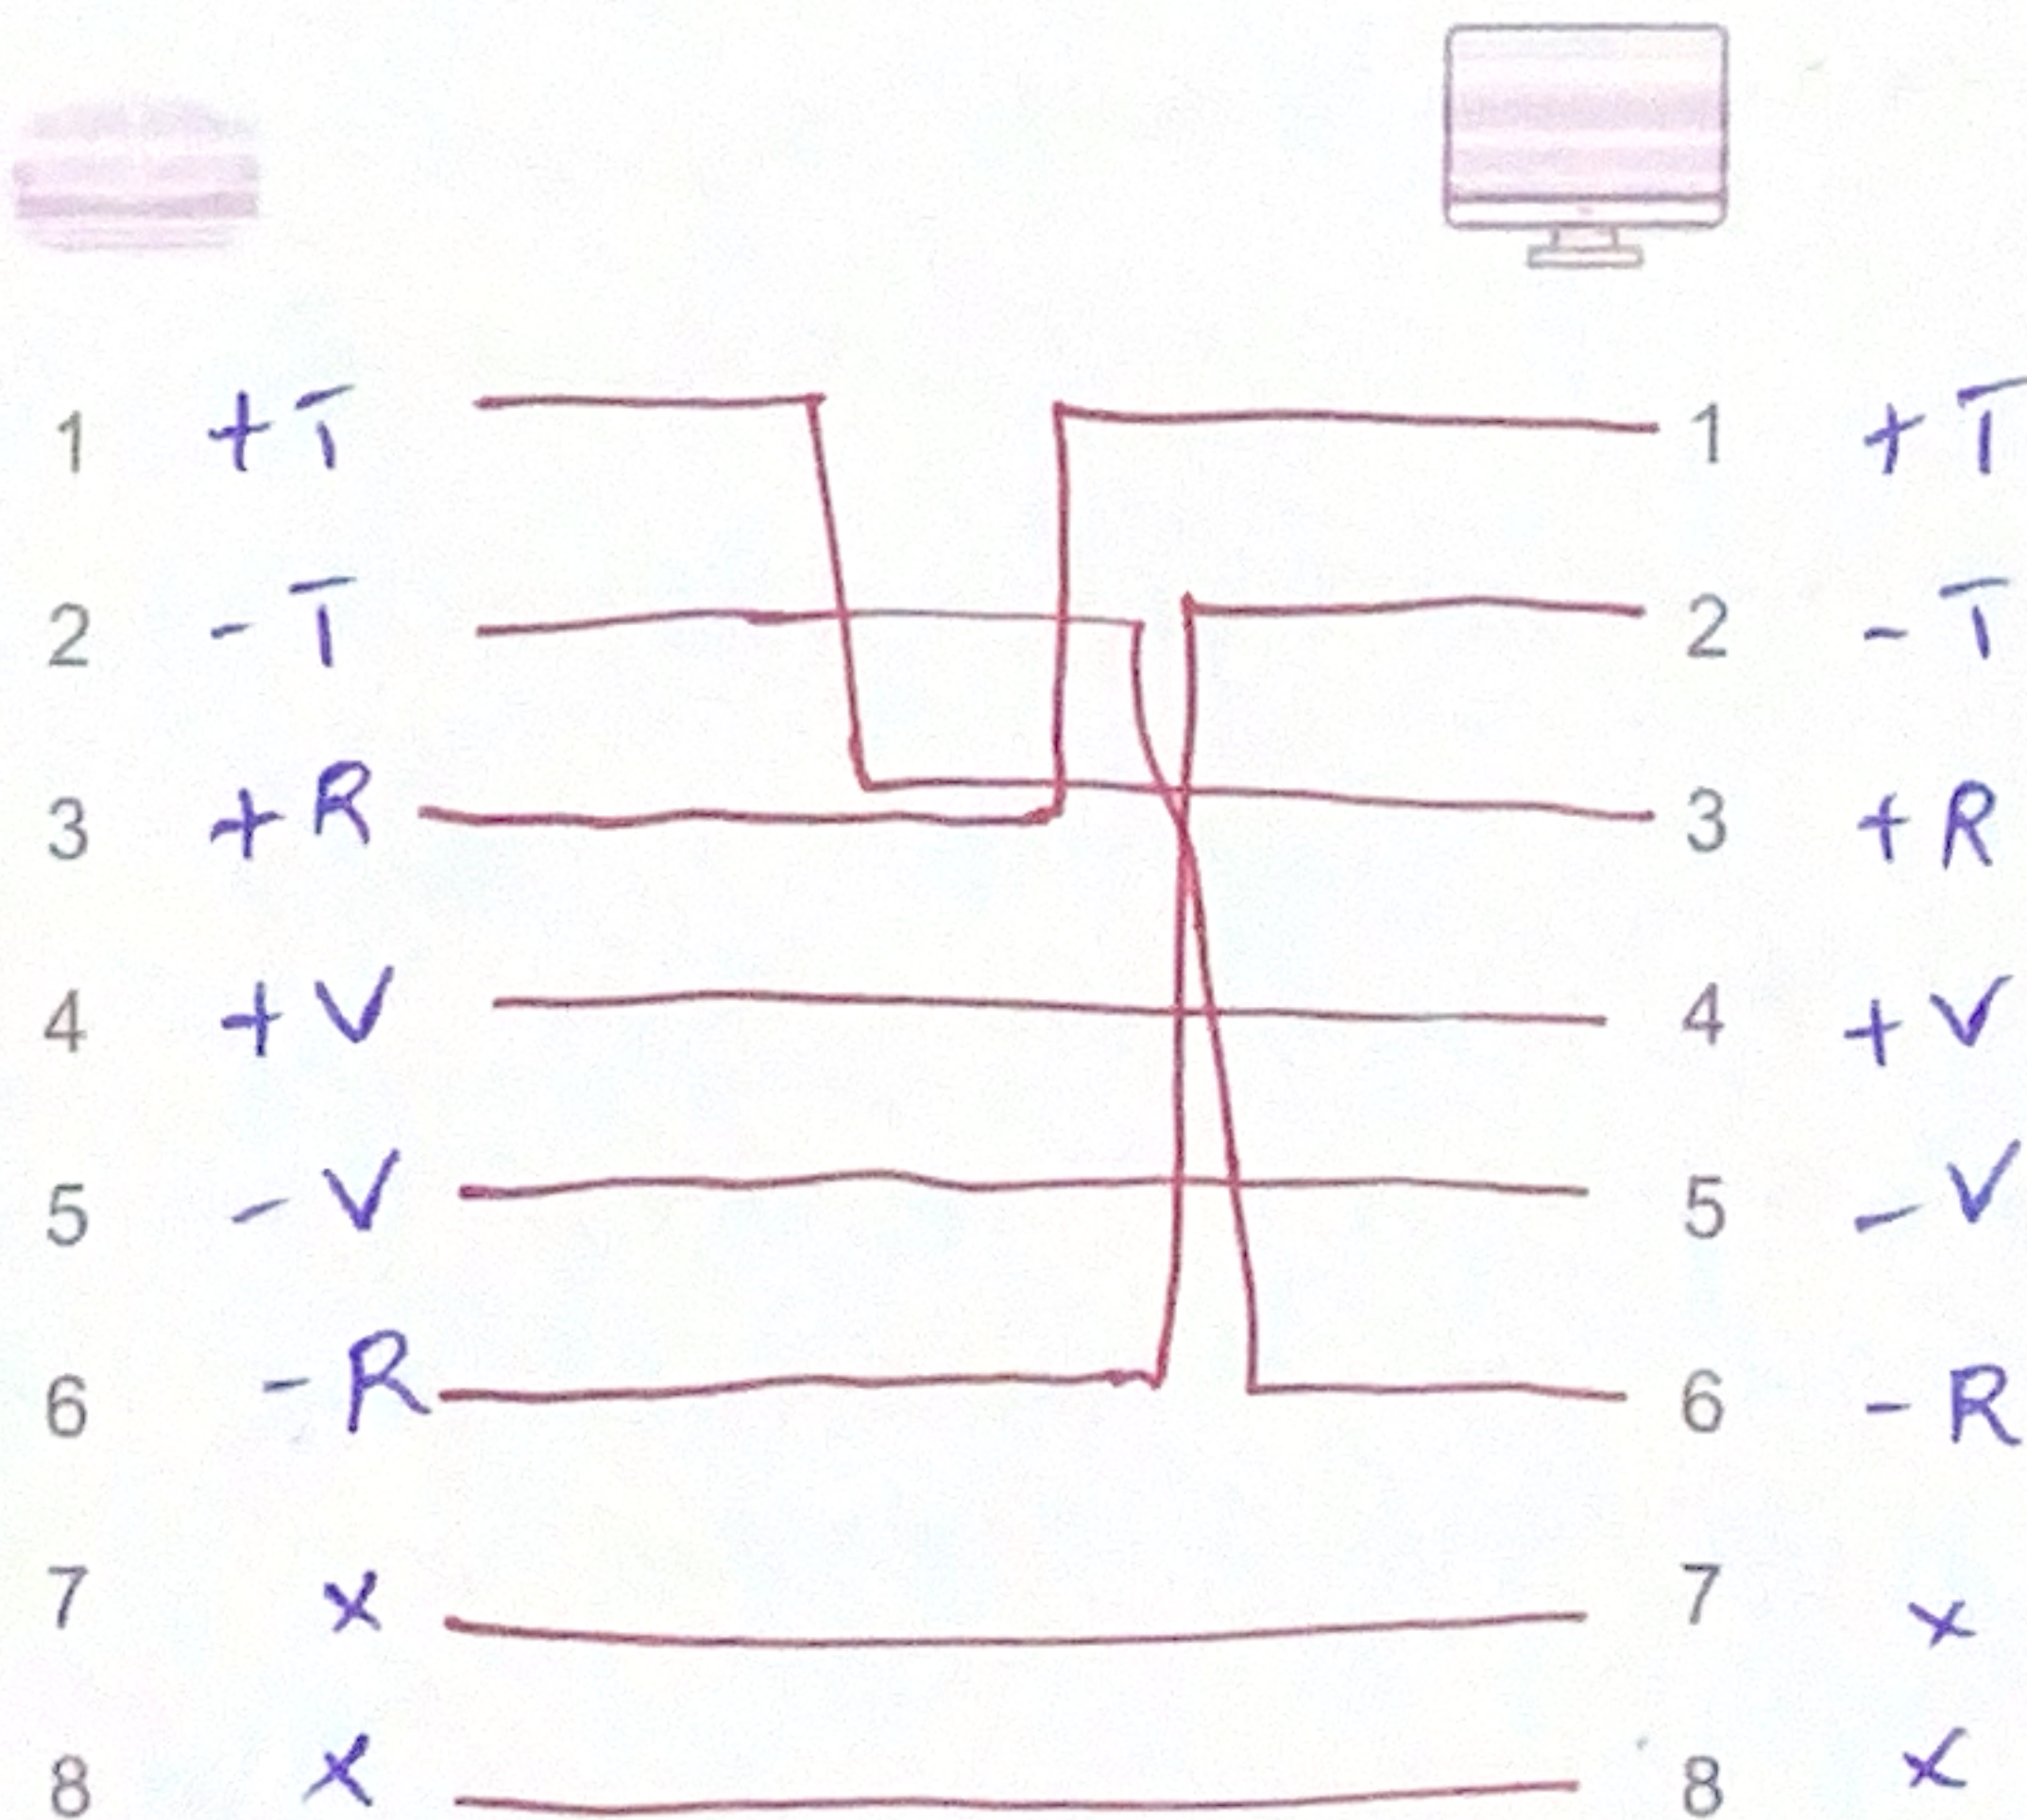

Electrical signal → UTP cable

Light Signal → Fiber Optic cable

2. Write down switch 8-pins ?

- 1 +T
- 2 -T
- 3 +R
- 4 +V
- 5 -V
- 6 -R
- 7 X
- 8 X

3. Connect utp cable between two devices

4. Explain AUTO MDIX ?

* Automatic medium-dependent Interface crossover is a ethernet (Auto-MDIX) feature that automatically detects how devices are connected and internally swap the transmit (Tx) and receive (Rx) wire pair if necessary.

5. Explain POE injector ?

* Electrical Power to a standard Ethernet cable allowing network device to receive both data and Power through the same cable.

6. Explain POE switch ?

* It provides both data and electrical power to connected devices through the same ethernet cable. It eliminated the need for separate power adapter for device like IP cam, Access Point...

7. Explain types of nic & function ?

NIC → Network Interface Card.

- It is a hardware component that allows a computer, server or network device to communicate with other devices over a network.

- Every NIC has unique MAC (Media Access Control)

- * Network Connectivity
- * Data Transmission
- * MAC Address
- * Data Conversion
- * Error Detection

- * Speed Negotiation
- * Full duplex Communication.
